DETAILED ACTION

Response to Arguments

1. Applicant's arguments with respect to claims 1, 2, 4-7, and 9-12 have been considered but are moot in view of the new ground(s) of rejection.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000. Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

3. Claims 1 and 9-12 are rejected under 35 U.S.C. 102(e) as being anticipated by DiFranza et al (US Patent 6,543,582 B2).

Regarding to claims 1 and 9, DiFranzo discloses a message processing system including a set of selectable parsers, each selectable parser being adapted for analyzing a respective set of message data formats and being selectable in response to identifying a message data format within the respective set (col. 15 lines 15-16), and a

process for invoking a parser from the set, wherein at least one of said selectable parsers includes means for parsing a first component (comment field) of a message having a message data format within the respective set (col. 15 lines 16-18); means for identifying the data format of a second component (message text) of the message (col. 15 lines 18-20); and means, responsive to said identification, for selecting another one of said set of parsers and for invoking the selected parser to parse the second message component (col. 15 lines 18-20).

Regarding to claim 10, DiFranza discloses the selected parser is adapted to access a format template from a format dictionary corresponding to the format indication (col. 14 lines 50-59).

Regarding to claim 11, DiFranza discloses parsing the first component is adapted to output a name-value pair (HTML) indicating the format of the second component (col. 15 lines 20-21).

Regarding to claim 12, DiFranza discloses analyzing a format field of the second component (col. 15 lines 18-20).

Allowable Subject Matter

4. Claims 2, 4, and 5 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

5. Claims 6 and 7 are allowed.
